

VIDEO & IMAGES WITH AI · HOMEWORK

Ivan's raw take, cut to a 65-second promo.

Ivan's sample video sells the 10-day Executive Assistant Bootcamp to future EAs. I cut his retakes, put AI-made B-roll on the exact lines it illustrates, added captions and closed on a branded call to action. Every number on screen comes from his own script.

ON-BRAND IMAGES

WHAT THE HOMEWORK ASKED, AND WHERE IT IS

ASKED	DONE	PAGE
Edit Ivan's sample video into one finished piece	Vertical 9:16, 1:05, linked above	1
Remove the silences (and the retakes)	5 repeated lines and every long pause cut	2
Use AI to make B-roll that illustrates the point	6 B-roll clips + 1 animated end card, each placed on its line	2-3
Captions	Burned in, word by word	2
Submit the prompts	All 7 video prompts + 3 image prompts, word for word	3-4
2-3 on-brand images	3 ad images on Pareto's real palette and fonts	4

1 • The edit

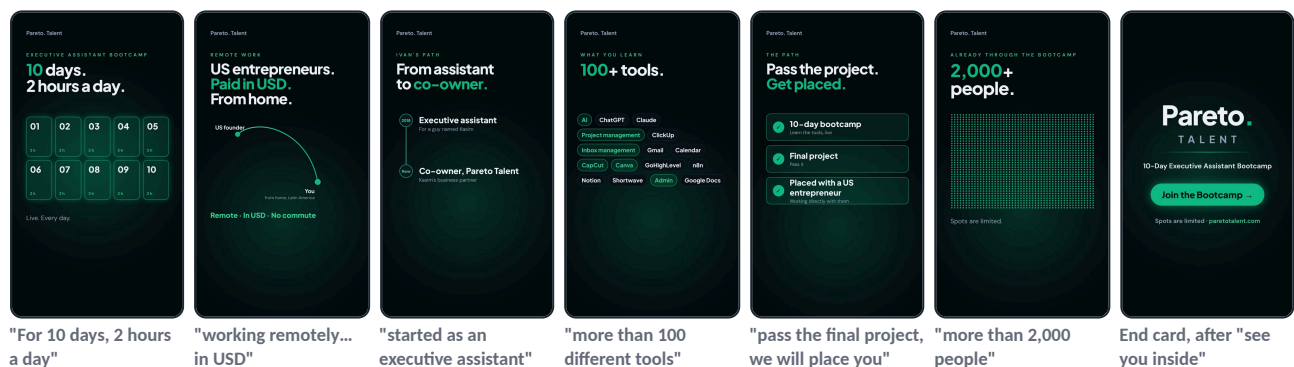

The brief I worked from: the audience is people who want to become remote EAs, not founders. So every visual answers their question: *what do I learn, what do I earn, how do I get placed?*

WHAT I CUT

IVAN SAID IT TWICE	KEPT
"And the reason I know all these tools..." (first try stumbles)	The clean second take
"For 10 days, for 10 days..."	One "For 10 days, we will be teaching you AI..."
"So, so join..."	"So, join our bootcamp."
"More than 2,000... so it's more than 2,000"	One clean line + "you can see all of their reviews"
Every pause longer than about half a second	Cut, so the pace never drops

WHERE EACH CLIP LANDS

B-roll sits on the overlay track for 3–4.5 s, starting on the first word of its line. Ivan's voice keeps running underneath, and he's back on screen between clips: the B-roll illustrates him, it doesn't replace him.

FINISH

Captions

Burned in, word by word with the active word highlighted, in the lower third so they never cover a B-roll headline.

Ending

Ivan's last line goes straight into a 6-second animated end card: wordmark, "10-Day Executive Assistant Bootcamp", a pulsing "Join the Bootcamp" button and "Spots are limited · paretotalent.com".

2 • The B-roll prompts

How they were made: Claude, prompted the "Claude Design" way shown in class: the motion graphic is generated as code from a text prompt, then rendered frame by frame to MP4 (1080×1920, 30 fps). **Why code, not a video model:** text and numbers stay sharp and spelled right, and the colors are Pareto's exact ones from paretotalent.com: #050A0E, #10B981 / #34D399, Plus Jakarta Sans ExtraBold, DM Sans. Bottom third kept clear for captions.

1 • 10 days

"Vertical motion graphic on Pareto's dark palette. Headline counts up '1 days → 10 days. 2 hours a day.' Ten day tiles (01-10, each '2 h') light up green one after another. Subline: 'Live. Every day.'"

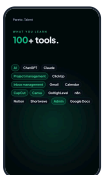

2 • Remote, in USD

"Headline 'US entrepreneurs. Paid in USD. From home.' A green arc draws from a pulsing dot labeled 'You, from home, Latin America' to a dot labeled 'US founder'. Footer: 'Remote · In USD · No commute'."

3 • Assistant to co-owner

"Headline 'From assistant to co-owner.' A vertical timeline draws two milestones: 'Executive assistant, for a guy named Kasim' → 'Now · Co-owner, Pareto Talent, Kasim's business partner'."

4 • 100+ tools

"Headline counter '0+ tools' → '100+ tools'. Tool chips pop in: AI, ChatGPT, Claude, Project management, ClickUp, Inbox management, Gmail, Calendar, CapCut, Canva, GoHighLevel, n8n, Notion, Shortwave, Admin, Google Docs. Skill chips highlighted green."

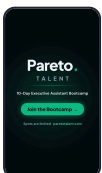

5 • Get placed

"Headline 'Pass the project. Get placed.' Three cards check off in order: '10-day bootcamp' → 'Final project' → 'Placed with a US entrepreneur'."

6 • 2,000+ people

"Headline counter '0+ people' → '2,000+ people'. A grid of 2,000 dots turns green at random. Footer appears: 'Spots are limited.'"

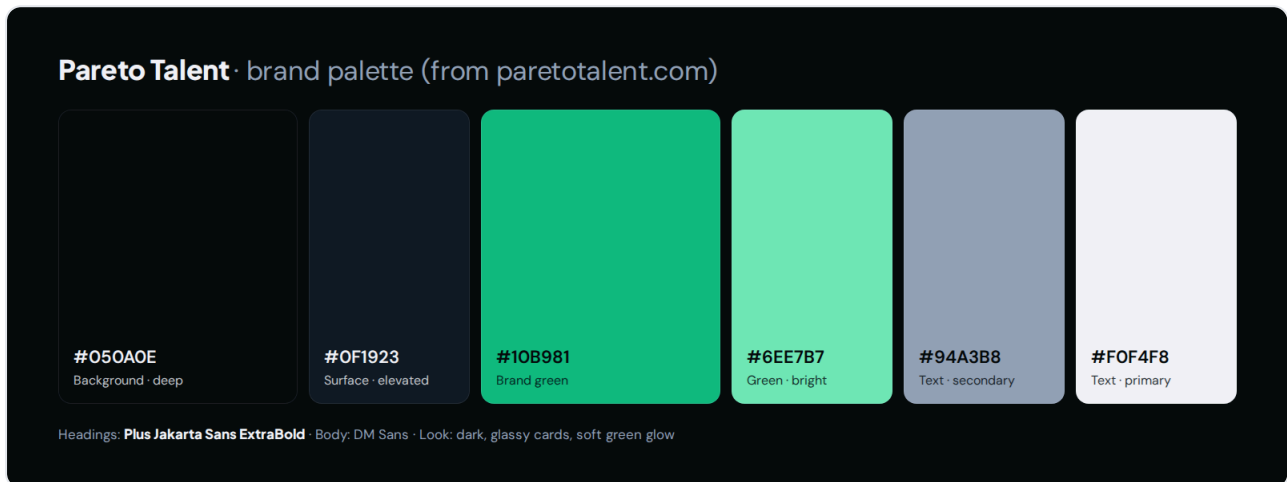

7 • End card

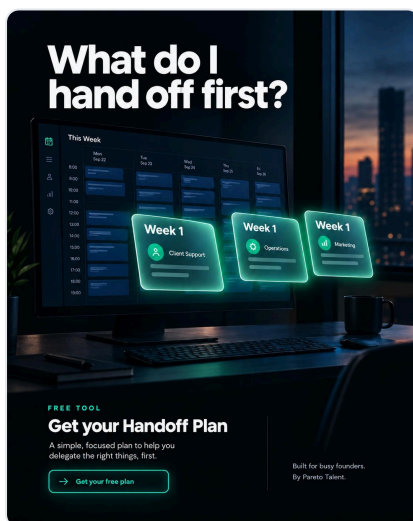

"Vertical 6-second end card on Pareto's dark palette. A thin green ring expands from the center, the wordmark 'Pareto' rises letter by letter and a green dot pops in. 'TALENT' tightens into place in spaced capitals over a green light line. Then '10-Day Executive Assistant Bootcamp', a green pill button 'Join the Bootcamp →' that springs in and pulses, and the footer 'Spots are limited · paretotalent.com'."

3 • The images

The rule: image models drift to purple and teal "AI" colors. So the same style guide went into every prompt, with a screenshot of Pareto's real palette attached: "Premium, cinematic, editorial. Near-black background (#050A0E), deep navy surfaces (#0F1923), one accent: Pareto green (#10B981) with a soft glow. Bold geometric sans headlines, white. No stock-photo smiles, no clutter, no logos, no purple. 4:5."

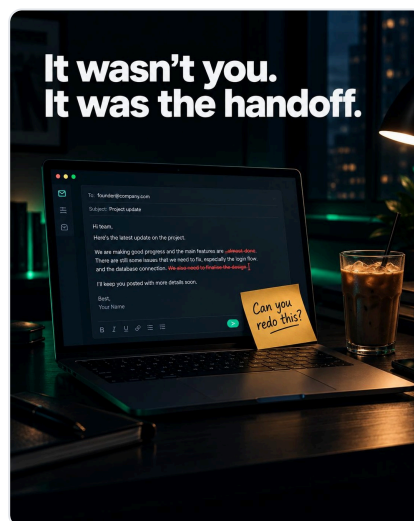

The palette screenshot attached to every image prompt, taken from paretotalent.com's CSS.

1 • CHATGPT IMAGE

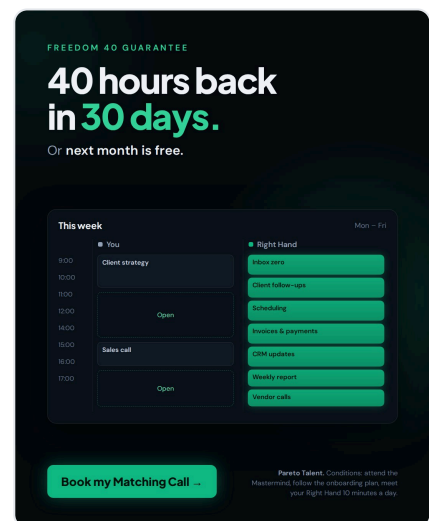

"Facebook ad image for a free delegation tool for busy founders. A founder's weekly calendar on a large monitor in a dark, modern office at dusk, packed solid with dark navy blocks. Three blocks lift off the screen and float forward as glowing glass cards labeled 'Week 1'. Top text: 'What do I hand off first?' Style guide + attached palette. 4:5."

+ one fix: "Keep everything exactly the same. Only change: the headline must read 'hand off', and all three cards clearly read 'Week 1'."

2 • CHATGPT IMAGE

"Ad image for founders whose last assistant didn't work out. A desk at night, a laptop showing an email draft with red edits, a yellow sticky note that reads exactly 'Can you redo this?' beside a cold coffee. Moody, cinematic, warm practical light, near-black room, subtle green glow. Top text, exactly: 'It wasn't you. It was the handoff.' 4:5."

3 • CLAUDE, BUILT AS CODE

"Ad image, 1080x1350, Pareto brand. Headline '40 hours back in 30 days.' Subline 'Or next month is free.' A split dark-mode week calendar: 'You' mostly open, 'Right Hand' full of green blocks (Inbox zero, Follow-ups, Scheduling, Invoices & payments, CRM, Weekly report, Vendor calls). CTA 'Book my Matching Call', guarantee conditions in small print."

Why the third one is code: ChatGPT's free image limit ran out after two images, and a calendar is interface anyway: built as code, every word is spelled right and every color is exact.

4 • How it was made

STEP	TOOL	WHAT IT DID
Read the brief	Claude	Read Ivan's transcript first. That's how I caught that the video speaks to future EAs, not founders, and rebuilt the B-roll for that audience.
B-roll + end card	Claude (code → MP4)	7 vertical clips on Pareto's real colors and fonts, each built from one claim in Ivan's script
Images	ChatGPT image + Claude	2 photo-style ads, 1 interface ad, same style guide and palette
Cut, overlay, export	CapCut	Retakes and silences out, B-roll on the overlay track, 9:16 export
Captions	Auto-captions	Word-by-word captions, active word highlighted, lower third
Hosting	Google Drive	Shared "anyone with the link", tested in an incognito window

DECISIONS A CLIENT WOULD CARE ABOUT

NOTHING INVENTED	Every number on screen (10 days, 2 hours a day, 100+ tools, 2,000+ people, placement after the final project) is something Ivan says. If he didn't say it, it isn't in a clip.
IVAN STAYS THE HERO	The B-roll covers about half the video and always cuts back to him. People join a bootcamp because of the person teaching it, so he opens it, links every point and closes it on camera.
BUILT FOR MUTE	Most feed video plays muted. With burned-in captions and a headline on every clip, the pitch still lands with the sound off.
ONE CLEAR ASK	The video ends on a single action, "Join the Bootcamp", plus the scarcity Ivan states himself: spots are limited.
REUSABLE	The 7 clips are code, so changing a number or the language is one edit and one re-render, not a new shoot. The same template can promote the next cohort.
