

INBOX, CALENDAR & CONTRACTS · HOMEWORK

"Make sure it's all correct." It wasn't. Seven times.

Kasim asked me to send James the final contract. Before sending, I checked every term against the thread. The draft had 6 errors, and the change everyone agreed to rested on a wrong date. Here is the reply, the corrected contract and the booking link.

THE THREE LINKS

CONTRACT [Corrected contract \(Google Doc, changes highlighted\)](#)BOOKING [Kickoff Call booking page \(Google Calendar\)](#)ALL WORK [All my bootcamp homework, one link](#)

WHAT THE HOMEWORK ASKED, AND WHERE IT IS

ASKED	DONE	PAGE
Review the thread and the draft, find every discrepancy	7 issues + 1 process gap, each traced to the email that proves it	2
Draft the reply to Kasim and James with the corrected contract	Slack to Kasim first, then the email to James (cc Kasim + legal)	3
3-4 sentences on what you caught and why it matters	The explanation	4
Your own Google Calendar booking link, inside the reply	Live booking page, set up for Kasim's time zone	4
Sort a real inbox with Shortwave: before / after	Shortwave AI on my inbox: 11 threads done, 1 to-do	5
Links or screenshots of the AI chats used	How AI was used, step by step	6
Bonus: SOP for a Google Calendar booking page	15 steps written to Kasim, with a final check	7

1 • What I caught

Every row is checked against a written email (E1–E8), not against memory. The weekdays were checked on a 2026 calendar.

#	WHERE	DRAFT SAYS	AGREED IN WRITING	RISK IF SENT AS-IS
1	Thread, E7	James: "June 1st is a Sunday"	June 1, 2026 is a Monday. June 3 is a Wednesday	The "fix" moves the kickoff <i>off</i> the Monday James wanted
2	\$4 Deliverables	Eight (8) blog posts	10 posts (E3, E4, E8)	Scope dispute, unpaid extra work
3	\$2 Term	June 1 – Aug 31	June 3 – Sept 3 (E7, E8)	Wrong term, wrong completion date
4	\$3 Payment 2	Due Aug 1 "(Month 2)"	25% "at month 2" (E2–E4). "Month 2" is never defined	Aug 1 is a Saturday, and on the draft's own June 1 term it is day 1 of <i>Month 3</i> . A payment date that contradicts its own label gets paid late or argued about
5	\$6 Reporting	Monthly reports by the 5th	Bi-weekly (E3, E4); \$4 also says bi-weekly	The contract contradicts itself
6	\$5 Client duties	Brand assets: no date	LinkedIn access and brand assets by May 20 (E3, E4)	The agency can't start on time, with no leverage
7	Opening line	"Entered into as of June 1, 2026"	45% is due "upon contract signing"	The effective date falls after the first payment is due

Plus one process gap

Kasim's Slack says "James confirmed everything on our call this morning", but there are no call notes. Anything said on that call could change the terms, so I check with Kasim before anything goes to the client.

Judgment calls I flagged, not guessed

Month 2: I set July 3, the first day of Month 2 on the new term, and asked Kasim to confirm. **End date:** June 3 – Sept 3 is 3 months and one day (Sept 2 is exact). I kept Sept 3 because Kasim wrote it to James (E8); changing an agreed date silently is worse than one extra day.

HOW THE CORRECTED CONTRACT SHOWS THE CHANGES

Every corrected line is highlighted in yellow, so legal and James can see exactly what changed from the April 1 draft. The highlights come off before signature. Total, split and ad budget are unchanged: \$27,000 (45% \$12,150 · 25% \$6,750 · 30% \$8,100), \$15,000 LinkedIn budget billed to the client.

2 • The reply: Kasim first, then James

SLACK TO KASIM • THU APR 9, 2:35 PM MST

Hi Kasim, final contract for James is ready. Three quick checks before I send:

1. Start date. James asked to move to June 3 because "June 1st is a Sunday." June 1, 2026 is actually a **Monday** (June 3 is a Wednesday), so the change moves the kickoff off a Monday. I've built the contract as you agreed in writing (**June 3 – Sept 3**), and my email gives James a one-line option to go back to June 1 – Aug 31.

2. This morning's call. I don't have notes from it. Did anything change (price, scope, dates)?

3. Payment 2. The draft says Aug 1 "(Month 2)", but Aug 1 is a Saturday and isn't in Month 2 on the original term. I set **July 3** (first day of Month 2). Tell me if you meant the end of Month 2.

Unless you tell me otherwise, I'll send it at **4:00 PM**. I also fixed 4 more things in the draft (10 posts, bi-weekly reporting, brand-asset deadline, effective date). Full list in the email.

EMAIL TO JAMES • CC KASIM@FREEDOMMARKETING.COM, LEGAL@FREEDOMMARKETING.COM

Subject: Final contract: CloudSync × Freedom Marketing (ready to sign)

Hi James,

Following your call with Kasim this morning, here is the final contract with every term we agreed on: [corrected contract \(Google Doc\)](#)

What changed from the April 1 draft:

- 1. Blog posts:** 10 SEO-optimized posts (the draft said 8).
- 2. Term:** June 3 – September 3, 2026 (was June 1 – August 31).
- 3. Payment 2** (25%, \$6,750): due **July 3, 2026**, the first day of Month 2. The draft said August 1, a Saturday, which on the original June 1 term is the first day of Month 3.
- 4. Reporting:** bi-weekly performance reports throughout. Section 6 of the draft still said monthly.
- 5. Brand assets:** guidelines, logos and approved messaging now due **May 20, 2026**, together with LinkedIn Ads access, as you confirmed on March 25.
- 6. Effective date:** the date of the last signature, since the first payment is due on signing.

Unchanged: \$27,000 total (45% \$12,150 on signing · 25% \$6,750 · 30% \$8,100 on completion), \$15,000 LinkedIn ad budget billed directly to your ad account, 3 LinkedIn campaigns, weekly 30-minute strategy calls.

One thing to double-check: you mentioned June 1 is a Sunday, but June 1, 2026 is a **Monday**. If a Monday kickoff is still the goal, we're happy to go back to **June 1 – August 31** (Payment 2 on July 1). Just reply "June 1" and I'll send that version the same day. Otherwise, this version is ready to sign.

To lock in the kickoff call, pick any time that works for you here: [Kickoff Call booking page](#)

Best regards,

Abdelhakim Boukeffoussa · Executive Assistant to Kasim Aslam · Freedom Marketing

3 • Why it matters

The most dangerous issue wasn't in the contract. James asked to move the start date because "June 1st is a Sunday," but June 1, 2026 is a Monday, so the change everyone agreed to would move the kickoff away from the Monday he wanted. The contract also missed or contradicted six agreed terms, and as drafted, Kasim's biggest client would have signed a \$27,000 contract that contradicts itself, with a \$6,750 payment due on a Saturday outside the month it names. So I checked with Kasim first, then sent James a version that matches every written term, with a one-line choice on the date so nothing gets decided by mistake.

4 • The booking link

SET UP THE WAY IVAN SHOWED

- 1 30 min kickoff, Google Meet added on booking
- 2 Mon-Fri 9-5 Arizona time (Kasim's, MST, no DST). Each guest sees their own zone: no "your time or mine?"
- 3 14-day window, 24 h notice
- 4 10-min buffer, max 3 calls a day
- 5 Guests can't add people; the description says what the call covers

The public booking page, as James sees it. The slots show in the viewer's time zone (here, Argentina: 9 AM Arizona = 1 PM).

5 • Shortwave: a real inbox, before and after

Shortwave (free plan) on my own Gmail. I clicked "Organize my inbox" and let the AI propose batches, then reviewed every batch before accepting it.

BEFORE

AFTER

AI BATCH	WHAT IT PROPOSED	WHAT I DID, AND WHY
1 • Promotions	Trash 8 promo / low-quality threads	Marked Done instead of Trash. Archive is not delete (Ivan's rule): out of the inbox, still searchable.
2 • FYI	Trash 3 system notices	Done, same reason. Security alerts stay findable.
3 • Actionable	A to-do: "Pareto Bootcamp – Homework & Final Project"	Accepted. The two emails that need action now sit in one to-do at the top.
4 • Star	Star an old login code	Skipped. A one-time code isn't important; starring it adds noise.

Result: 11 threads out of the inbox, 1 to-do with everything bootcamp-related, nothing deleted. The "99+" is older mail; the next step is Ivan's cutoff archive (everything older than 30 days), which I'd agree with the founder first.

6 • How AI built the reply

One AI (Claude), used as a checker, not as a writer of facts. Every claim it made was verified against the thread before it went into the reply.

- 1 **Read everything first.** Claude got the full thread (E1–E8) and the draft contract, and listed every term with the email that agreed it.
- 2 **Diff, not summary.** Each clause was compared with the last email that changed it, flagging anything different, missing or contradicting another clause. That produced issues 2–7. Where a term was ambiguous ("Month 2"), the decision went back to Kasim, not to the AI.
- 3 **Check the facts nobody checks.** The weekday of every date in the thread was computed for 2026 (June 1, June 3, July 3, Aug 1). That's how the Sunday claim fell apart (issue 1).
- 4 **Draft in the right order.** A Slack to Kasim first, with only the two things he must decide, then the email to James. Edited for tone: short, no blame, one clear choice.
- 5 **Stress test.** The draft was read as James's lawyer would read it. That added the effective-date fix and the one-line "June 1" option.

What I didn't let AI decide

Which start date to use, and whether to send before Kasim answered. Those are Kasim's calls, so the Slack asks him, and the email gives James a choice instead of guessing.

SCREENSHOTS OF THE AI CHAT

Screenshots of the chat are attached to my #Homework post.

BONUS

7 • SOP: a booking link in Google Calendar, in 5 minutes

For: Kasim Aslam · **From:** Abdelhakim, EA · **Tool:** Google Calendar (any Google account). One purpose per link: "Kickoff call" and "Weekly check-in" are two links with two durations.

- 1 **Open Google Calendar** → left sidebar → **Booking pages** → + (or Create → Appointment schedule).
- 2 **Title** it the way the client will read it: "Kickoff Call: CloudSync x Freedom Marketing".
- 3 **Duration:** 30 min kickoffs, 15 check-ins, 45 sales calls.
- 4 **Availability:** Repeat weekly, Mon–Fri, your real hours.
- 5 **Time zone:** **Phoenix, Arizona (GMT-7)**. The step that matters most. Skip it and the slots follow whatever zone the calendar opened in.
- 6 **Scheduling window:** max 14 days ahead, minimum notice 24 hours.
- 7 **Booked appointments:** 10-min buffer, max 3 a day, uncheck "Guests can invite others".
- 8 **Calendars:** keep "Avoid scheduling conflicts" on, so existing events block slots. Click **Next**.
- 9 **Location:** Google Meet. Each booking gets its own link.
- 10 **Description:** 2–3 lines on what the call is for and what to bring. It shows on the page and in the confirmation.
- 11 **Booking form:** name and email. Add a question only if you'll use the answer.
- 12 **Reminders:** leave the email reminder on. It cuts no-shows. **Save**.
- 13 **Copy link** from the booking page in the sidebar. Open **Preview** first: right hours, right zone?

BEFORE YOU SEND IT

☐ Opens in an incognito window, no login ☐ A test booking from a second email has a Meet link (then cancel it) ☐ Slots only inside real hours, with buffers and the daily cap. **In the email**, the link closes the conversation: "pick any time that works for you here". Never "your time or mine?"
