

The 40–Hour Handoff Plan

A free tool that tells a founder what to hand off first, in what order, and writes the brief for every task. Then it routes qualified founders to a Matching Call.

FULL NAME	Abdelhakim Boukeffoussa
APPLICATION EMAIL	babouabd23@gmail.com
LEAD MAGNET TITLE	The 40–Hour Handoff Plan
FUNNEL TOOL USED	GoHighLevel (form, calendar, pages, pipeline, workflows) · lead magnet hosted on GitHub Pages

From a founder's first click to a Matching Call

The whole project argues one thing: a founder who sees, in hours, what they should stop doing concludes that they need a Right Hand, and Pareto has one for them.

Part 1 · Mini Second Brain and market research (L1, L2)

WHAT I BUILT

A Claude Project called "Pareto Talent Bootcamp" with one set of instructions and the knowledge files below. Every page, email, ad and the lead magnet were written from it. L1 is its public mirror (a Claude Project needs a login). L2 is the research doc.

SOURCES FED (4 TYPES)

- **Pareto's public pages:** paretotalent.com (home, /about, /matching, /our-talent, /guides, /webinar, Wall of Love), thehirebook.com, kasimaslam.com. Offer, guarantees word for word, proof numbers, testimonials.
- **Transcripts:** Bootcamp classes Days 8–10 (Ivan) and three of Kasim's podcast interviews. ICP, personas from sales calls, the Idea Test and Pareto Score.
- **Documents:** the Final Project Guidelines and the Day 7–10 decks.
- **Live data I collected:** Meta Ad Library and Google Ads Transparency for 9 advertisers (Oct 4), 3 mystery-shopped opt-ins, and 182 founder quotes with sources.

Pareto frameworks it holds: the Black Box brief (goal, context, constraints, definition of done, decision latitude), the three-light decision model (green / yellow / red), Freedom 40, the Matching and Lifetime Replacement guarantees, the Idea Test and the Pareto Score.

THE 3 COMPETITOR LEAD MAGNETS (MYSTERY-SHOPPED WITH A TEST EMAIL, NO PHONE)

COMPETITOR	FORMAT	PROMISE · WHO	QUALIFICATION	AFTER OPT-IN (OBSERVED)
Athena	10-question delegation quiz	"Where the gaps are" · leaders who delegate	Name + email. No revenue question	Thank-you page says the result is emailed. It arrived about 2 minutes later, with a pitch for an EA.
BELAY	Gated PDF guide, "The EA Advantage"	How an EA helps at every stage · any founder	Name + email, phone optional. Revenue only on the call form	Inline "on its way" message + call button. Two emails 3 minutes later, one of them the wrong guide (payroll).
South	Free email course, "50+ tasks to delegate"	Tasks to hand off · growing owners	Email only	No thank-you page. Welcome + lesson 1 at once, lesson 2 the next day.

The gap: none qualifies by revenue, and none gives the founder a personal plan. They hand out a level, a list or a guide. Nobody, Pareto included, has a tool where the founder ticks their own tasks and gets hours, cost and ready-to-send briefs back.

PARETO'S ICP, IN ONE PARAGRAPH

Founders of service businesses (agencies, law firms, consultancies, coaching companies) doing \$50K+ a month, who are personally the bottleneck: every client, decision and approval still goes through them. The founder decides and the founder pays.

5 PERSONAS, BY CAUSE, IN CLIENT WORDS

PERSONA	THE TRIGGER	IN THEIR WORDS
The Ceiling	Everything routes through them	<i>"growth stalls at exactly the ceiling of what one person can personally touch"</i>
The Burned	A VA failed and they blame themselves	<i>"I keep thinking it was me until other staff and a second company ... had the same experiences."</i>
The Stacked Staff	Managing people became the job	<i>"I'm still creating more work for me, not less work for me"</i>
The Overpaying	Pays a premium EA brand, still checks every task	<i>"This is not high-leverage support. It is task execution that still requires close oversight"</i>
The Reluctant	Has the budget, not the picture	<i>"The first month of hiring my Belay assistant, I didn't know what tasks to give them. It was awkward."</i>

Links: L1, L2. Every quote has its source URL in L2.

Part 2 - Business Map (L3)

What I built: the journey from ad to Matching Call on the six-stage spine from Day 10: traffic, capture, qualify and nurture, then sales, money and handoff. Every step that exists links to the real asset behind it, so anyone can click from the map into the live page, form or workflow.

Gaps, marked honestly: ads are written but not running and the Pixel and Conversions API aren't installed; there's no call script for leads who come from the plan; the plan a founder builds lives in their browser and isn't yet sent to the CRM; stages after the call (payment, contract, onboarding) belong to Pareto's existing operation.

Link: L3.

Part 3 - ClickUp breakdown and SOP (L4, L5)

The board, worked back from October 7: 21 tasks, one per deliverable, each named after the part it belongs to (P1–P9) and the link it produces (L1–L15), so the board and this PDF use the same map. The order is the dependency chain: research (Sun 4) → lead magnet and funnel live (Mon 5) → CRM, automation and tests (Mon 5–Tue 6) → creative and documentation (Tue 6) → ship (Wed 7, target 18:00, six hours of buffer). Nothing gets built before the research says what to build, and nothing gets automated before the pages it points to exist. Statuses show where the project really stands: TO DO, IN PROGRESS, REVIEW, BLOCKED (waiting on someone else) and COMPLETE. Every open task has an owner and a due date. One task is deliberately after the deadline: sending from a [paretotalent.com](#) subdomain, the fix a real launch needs first.

The SOP covers launching a lead magnet funnel for Pareto in 4 working days: research, build what the founder sees, CRM and automation, then document and ship. It includes the definitions (qualified, lights, Black Box brief), the exact form logic, the test protocol and the lessons from this run.

Why this process: it's the one Pareto will repeat. Every new lead magnet, webinar or guide needs the same chain, so an SOP here saves days the next time, and a Right Hand can run it.

Links: L4, L5.

Part 4 - The lead magnet and the offer (written here, no link needed)

Format: a mini app (an interactive plan builder). A PDF can't know the founder's tasks. A quiz gives a score, not a Monday. The research showed the missing piece is a plan built from the founder's own week, and only a small app can do that in 7 minutes.

The promise: know exactly what to hand off first, in what order, and how to brief it, so your first hire doesn't fail for lack of context.

The title, MAGIC formula: The 40-Hour Handoff Plan. Magnetic reason: free, because founders who know what to hand off hire better. Avatar: founders who are the bottleneck. Goal: 40 hours back, the same number as Freedom 40. Interval: 7 minutes to build, 30 days to run. Container: a plan.

Value Equation: dream outcome up (hours back, shown in hours and in dollars at the founder's own rate); likelihood up (Pareto's own Black Box brief and three-light model, applied to their tasks); time delay down (7 minutes, Week 1 starts Monday); effort down (tick boxes, every brief is pre-written).

Qualified = monthly revenue \$50K+ AND 10+ hours a week on admin, inbox and follow-ups. \$50K is Ivan's line from Day 8; at that revenue, a Right Hand at \$3,000–3,600 a month is about 6–7% of revenue. Ten hours a week is the point where the work is a full role, not a few tasks. Pareto's own pages use \$25K, \$50K and \$100K; I used \$50K and flagged the inconsistency.

The next-step offer: a 20-minute Matching Call. We turn the founder's plan into a Right Hand profile, and they get 3 hand-picked, pre-trained profiles within 24 hours. It's backed by Freedom 40 (40 hours back in the first 30 days, or next month free, with its three conditions) and the Matching Guarantee (no contract until they find their person). The plan has already shown them the hours; the call shows them who takes them.

Part 5 - The lead magnet itself (L6)

What's inside: 30 recurring founder tasks in 6 areas (inbox and messages, calendar and meetings, clients and sales follow-up, operations and projects, money admin, growth and content support). The founder ticks theirs and sets the hours. Each task carries a light: green = hand off now, yellow = hand off with a brief and a check-in, red = keep. The output is the hours per week and per month, the cost at the founder's own rate, a 4-week handoff plan ordered by hours and risk, and a copy-ready Black Box brief for every task. They can print it or save it as a PDF. If the plan frees 10+ hours a week, it says so plainly ("that's a Right Hand's job") and offers the Matching Call.

How the Second Brain built it: the task library and every brief came from the knowledge files (Pareto's frameworks plus the 182 founder quotes), and a fact check removed every number not found in them.

Automatic delivery: the opt-in workflow sends "Your 40-Hour Handoff Plan" with the link the instant the form is submitted, to qualified and unqualified founders alike. Tested on Oct 5 with two fresh leads: the email reached the inbox within a minute of the form. It landed in Gmail's Spam folder,

because the shared bootcamp account sends from a generic domain; for a real launch it would go out from a paretotalent.com subdomain with SPF, DKIM and DMARC set up (see Part 7).

Link: L6.

Part 6 · The funnel (L7, L8, L9, L10)

Tool: GoHighLevel, because the form, calendar, pages, pipeline and workflows live in one place, and the form can redirect by answer. The lead magnet itself is hosted on GitHub Pages because it's a small app with its own code.

Landing page sections, in order: hero ("You're not bad at delegating. Nobody told you what to hand off first.") with an animated hourglass that pours 40 hour-blocks into a week, and the Freedom 40 guarantee as the hook; an example founder week where everything a Right Hand can own moves out of the founder's column; a "today vs with a Right Hand" diagram; what's inside the plan, with a live demo the visitor can tick; a cost calculator against the \$3,000-a-month plan; the full delegation system; the three guarantees; Pareto's real pricing; who it's for (and who it isn't); proof (100+ founders, 4.9★ on Google, 93% still with Pareto after 12 months, 1,000+ applicants per placement) and four founder quotes; then the form. Built in Pareto's own colors and fonts, with scroll animations that respect "reduce motion".

Qualification questions: monthly revenue (5 bands), hours a week on admin, inbox and follow-ups (4 bands), and the founder's biggest bottleneck in their own words (it becomes the brief for the call).

Redirect logic (Conditional Logic → Redirect to URL, top-down, first match wins): revenue under \$50K → thank-you page; admin under 10 hours → thank-you page; everyone else → booking page. Tested on Oct 5: \$100K–\$250K and 20+ hours went to the booking page; under \$25K and 5–10 hours went to the thank-you page.

Booking page: confirms they qualify, explains the 20 minutes (we turn your plan into a Right Hand profile; 3 profiles within 24 hours), a real Pareto client testimonial video right next to the calendar, the three guarantees, the pricing, and the Matching Call calendar.

Thank-you page: the plan's link, what arrives by email, how to use the plan this week, and the "faster to do it myself" objection answered.

Links: L7, L8, L9, L10.

Part 7 · CRM and automation (L11, L12)

Pipeline: Opted In (10%) → Qualified (30%) → Call Booked (60%) → Client (100%), plus Unqualified (0%), where non-qualified leads sit while the nurture runs. No lead is moved by hand: the workflows create the opportunity and move it on every event. The form answers are saved in three custom fields, so the Matching Call starts with the founder's revenue, hours and bottleneck already on the contact.

WORKFLOW	TRIGGER	ACTIONS AND TIMING
Opt-in	Form submitted (this form only; the account is shared)	Send the delivery email instantly · tag qualified or unqualified · create the opportunity in the right stage · notify me (not "all users")

Qualified follow-up	Tag "qualified", no booking	3 emails, day 1, 3 and 6 (the guidelines ask for 2; I built 3). Stops the moment a call is booked
Unqualified nurture	Tag "unqualified"	3 emails, day 1, 3 and 6: how to brief, what never to hand off, how to check work without micromanaging
Booking	Appointment booked on the Matching Call calendar	Confirmation instantly (time, video link, plan link, reschedule link) · move to Call Booked · stop the follow-up and nurture · reminder 24 hours before

Testing: two fresh leads on Oct 5, one per path, with the waits set to minutes for the test and then put back to days. Every step ran: delivery, tags, stages, owner notification, Q1–Q3 and N1–N3 in order. The qualified lead then booked a Matching Call: confirmation with the time, video link, plan and reschedule links; stage moved to Call Booked; follow-up stopped; reminder scheduled 24 hours before, and it fired on time on Oct 7 (logged), although GoHighLevel reports that email as failed to deliver, the same sending-domain problem. Execution logs, the pipeline board and the inbox are in L11 and L12. Two findings a real launch would fix first: the emails land in Spam (shared sending domain), and other students' unfiltered workflows also fired on my test contacts. Mine are filtered, so they never fire on anyone else's.

Workflows on or off: On. The guidelines' own check expects the plan to arrive by email and the form to redirect, and a reviewer testing the funnel should see the real thing. It is safe in a shared account because every trigger is filtered to this project's form, tags and calendar, the follow-ups are tag-triggered so nothing loops, and the owner notification goes to one named user.

Links: L11, L12.

Part 8 · Launch materials (L13, L14)

AD	PERSONA × ANGLE	HOOK	GOES TO
1 ToF	The Reluctant × know what to hand off first	"You're not bad at delegating. Nobody told you what to hand off first."	Landing page
2 MoF	The Burned × it wasn't you, it was the handoff	"Your last assistant didn't fail. Your handoff did."	Landing page
3 ToF	The Ceiling × your calendar tells the truth	"Your calendar says your priority is email."	Landing page
4 MoF	The Stacked Staff × an owner, not a task-taker	"You hired people. Somehow you got more work."	Landing page
5 BoF	The Ceiling × Freedom 40 (retargeting plan downloaders)	"You made the plan. Now hand it to someone who runs it."	Booking page

Five messages, not five hooks on one: what to hand off, why the last hire failed, what the calendar costs, why a team made it worse, and the guarantee that removes the risk. Every ad has a hook, offer, qualifier, real proof, mechanism and CTA.

Imagery prompts: every prompt carries a scene description, the same style guide (premium, cinematic, near-black #050A0E, navy #0F1923, one accent: Pareto green #10B981, bold geometric sans, no stock smiles, no logos) and a screenshot of Pareto's real palette. I iterated instead of regenerating: Ad 1's first take spelled "handoff", so I asked for that single change. All prompts are in L13. Ads 1 and 2 use AI images (ChatGPT, style guide and palette attached). Ads 3–5 are designed as

UI cards on Pareto's own tokens, because a calendar or an approval level reads clearer as an interface than as a photo. Every image and prompt is in L14.

Links: L13, L14.

Part 9 - Loom (L15)

A short walkthrough in plain language, the way I would explain it to a busy founder: the problem (founders don't know what to hand off first), the free tool that solves it, how the form sorts good-fit founders to a call, what runs automatically after that, the one thing I would fix before launch (email delivery from Pareto's own domain), and the ads that bring traffic.

Link: L15.

What else would you bring?

- **A mystery shop of the competition's follow-up.** I opted in to three competitors and logged every email. BELAY sent the wrong guide. That's why the opt-in workflow here sends one email with the right link and nothing else.
- **A 182-quote voice-of-customer bank** with sources, so every hook, persona and objection uses founders' own words.
- **Brand pulled from the live site's CSS** (colors, fonts, radius), so the ads, plan, pages and emails look like Pareto, not like a template.
- **Three inconsistencies found on Pareto's own site**, flagged and not copied: qualification at \$25K, \$50K and \$100K; "top 1%" next to "1 in 1,000"; two founder-pain numbers that swap between extractions.
- **The plan as a sales asset:** the founder arrives at the call with their own hours, cost and priorities. Next step: send the plan's results into GHL custom fields so the sales team sees them before the call.
