

HIGHLEVEL: RUN THE FUNNEL · HOMEWORK

One form.

Five actions. Zero manual work.

The Right Hand landing page from Day 5 now has a working back end. A founder answers 2 questions, and the CRM does the rest.

LANDING PAGE WITH THE EMBEDDED FORM

sites.leadconnectorhq.com/preview/d3RjdDPbtlfeU9cS3aGn

WHAT THE HOMEWORK ASKED, AND WHERE IT IS

ASKED	DONE	PAGE
CRM pipeline with 5 stages, lead to conversion	Applied → Qualified → Call Booked → Profiles Sent → Placed	2
Form built in Form Builder, embedded in Friday's page	2-question qualifier, inside the page's final section	2
Workflow triggered by that form	Trigger filtered to my form only	3
Tag the contact on submission	ab-rh::form-submitted	3
Create an opportunity in the right stage	Created in Applied; \$100K+ moves to Qualified	3
Internal notification to myself, not the workspace	Email to one user: me	3
2+ sequenced emails: confirmation, then follow-up on a delay	Email 1 instant, Email 2 after 1 day	5
Test the whole chain	2 test leads, every step green	4
Optional: tag openers or clickers as Engaged Lead	Configured as a second workflow	5

1 • Pipeline and form

PIPELINE: ABDELHAKIM BOUKEFFOUSSA, RIGHT HAND PROGRAM

Stages are named as things that already happened, so the board reads like progress. Lost leads use the opportunity status, not a 6th stage. Value per opportunity: \$36,000 (annual plan).

FORM: ABDELHAKIM BOUKEFFOUSSA, RIGHT HAND QUALIFIER

FIELD	WHY
First name, email	Personalize the emails
Monthly revenue	Decides Qualified or not (cut at \$100K)
What to hand off first	Tells me what the call should open with
Phone (optional)	Fewer required fields, more submissions

Button: "Check if I qualify", not "Submit". It says what happens.

Embedded: inline in the page's final section. Every "Check if I qualify" button on the page scrolls to it.

Honest: a line above the button says it's a concept form for the bootcamp, not a real Pareto application.

PIPELINE AFTER TESTING

2 • The workflow

Workflow AB 01 on the canvas, top half and bottom half.

- 1 **Trigger:** Form submitted, filtered to *Right Hand Qualifier* only
- 2 **Tag:** ab-rh::form-submitted
- 3 **Opportunity:** created in **Applied**, \$36,000
- 4 **Notify me:** email to one user (me) with name, revenue and what they'd hand off
- 5 **Email 1:** confirmation, instant
- 6 **Wait:** 1 day
- 7 **Email 2:** the value follow-up
- 8 **Qualified?** Revenue \$100K-\$250K or \$250K+
Yes: tag qualified + move to **Qualified**
No: tag not-a-fit

RULES I FOLLOWED

Filtered trigger. The account is shared. Without the filter, every student's form would fire my workflow.

Tag first. Every contact is labeled before anything else runs.

Notify myself only. Not "all users".

My name on everything. Pipeline, form, workflow and tags start with my name or ab-rh.

Branch at the end. Both emails go to every lead; the revenue check only sorts the pipeline.

3 • Tested end to end

Two fake leads through the live page. For the test only, the 1-day wait was set to 2 minutes, then put back.

The notifications in my inbox, one per lead.

4 • The emails and the stretch

Email 1, instant. It says what happens next and sends them to Pareto's real matching page.

Email 2, one day later. The math: 40 hours at their rate vs the price.

STRETCH • ENGAGED LEAD

Workflow AB 02: Trigger link clicked, filtered to my own link, then tag ab-rh::engaged-lead.

Clicks, not opens. Apple Mail and some security tools open emails automatically, so "opened" would tag people who never read anything.
